Education

Pratibha College of Commerce and Computer Studies

Bachelor of Computer Application

June 2020 - April 2023

Pune, India

Symbiosis International University

Master of Computer Application

Jan 2024 - May 2026

Pune, India

Experience

ZIONIT AI SOFTWARE PVT. LTD

Junior Software Engineer

Oct 2024 - Present

Pune, India

- Developed 4+ production-grade React.js & TypeScript applications, improving user experience by 35%.
- Built responsive, reusable UI components with Shadcn UI & Tailwind CSS, reducing development time by 40% and improving design consistency.
- Integrated REST APIs using TanStack Query, optimizing data fetching and reducing latency by 45%.
- Implemented complex, multi-step forms with Zod schema validation, reducing submission errors by 30%.
- Optimized frontend performance through lazy loading, code splitting, and memoization, achieving 50% faster load times.
- Implemented role-based authentication and protected routing, reducing unauthorized access by 35%.
- Refactored legacy code into reusable, typed components, reducing duplication by 45%.
- Collaborated with cross-functional teams (design, backend, QA) to accelerate feature delivery by 30%.

Projects

Patient Management System (Healthcare) — Frontend Lead

- Architected the frontend of a full-stack healthcare platform using React, TypeScript, and Tailwind CSS, consuming a Spring Boot + MySQL backend, cutting UI development time by 35%.
- Built patient registration, doctor scheduling, medical history dashboards, and appointment booking flows with reusable, typed React components, improving clinical workflow efficiency by 30%.
- Implemented Zod-based form validation and secure, role-based UI states for HIPAA-compliant data handling, reducing form errors by 25%.
- Improved perceived performance with lazy loading, code splitting, and optimized API calls, reducing dashboard load time by 40%.

Multi-Cloud Monitoring Platform (CloudPulse)

- Built an Infrastructure screen with VM-wise resource details (CPU, memory, disk, network usage) across AWS, Azure & GCP, improving infra visibility by 40%.
- Developed a Resources & Security screen surfacing per-resource details and real-time security alerts, cutting time to detect misconfigurations by 35%.
- Built a Cost & Billing module with cost-optimization recommendations and billing breakdowns, helping teams identify up to 20% in potential cost savings.
- Implemented an Organization module for role-based permission management and multi-cloud account/provider onboarding (AWS, Azure, GCP), reducing account setup time by 30%.
- Designed a reusable component system (data tables, stat cards, charts) with React, TypeScript, Tailwind CSS & shadcn/ui across all 12 screens for visual and functional consistency.

Email Campaign Management Platform

- Built a drag-and-drop email template editor in React & TypeScript, cutting campaign template creation time by 50%.
- Implemented prospect/group selection for targeted campaign audiences, enabling segmented sends across multiple contact lists.
- Built campaign scheduling with calendar-based send configuration, reducing manual scheduling effort by 40%.
- Integrated mail-sending APIs with real-time delivery status tracking, improving delivery visibility by 45%.
- Developed analytics dashboards (open rate, click-through rate, bounce rate) using Recharts with filterable, date-ranged views.

Technical Skills

Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Shadcn UI, TanStack Query, Zod, Redux, Zustand, Framer Motion, Recharts

Backend & Database: Java, Python, REST APIs, MySQL

Tools: Git, GitHub, Postman, VS Code

AI Productivity: Using AI tools for faster development, debugging, code generation, and workflow automation
